Dear Players' Agent!

I would like to inform you about our internet platform www.aleosport.com.

Aleosport.com is an innovative players' database, where you can present your players to a broad public all over the world. Creating an account for each of your players you can add personal data, records, pictures and videos to the accounts of your players to present your players in the best possible way. Managers from all over the world can register and check for suitable players for their clubs online. The advantage of aleosport.com is, that you just need to maintain one account for each of your players and you don't have to send a bunch of DVDs, CVs and pictures all over the world to give a first impression. Registered club managers have the opportunity to search players by several functions like "position", "age", "nationality" etc.. With aleosport.com you enlarge the opportunity to find a suitable club for your players!

As a manager of several players you have the opportunity to create accounts for all of your players. As contact details we recommend to give the contact details of your office for each of the players to be aware of developments. Once a club is interested in a player representatives of the club can contact you for further information. If you would like to create accounts for all of your players with your own e-mail address, please send an e-mail with the address you would like to use to webmaster@aleosport.com and we will activate it for you.

Currently our service is available in English and German only. Please find the UK-flag at the top right of the www.aleosport.com. We'll be working on a Portuguese version in the future.

Best regards,

Marcus Haase
Managing Director
FIFA Players' Agent
